SPL - Sailplane Pilot License - Flight Performance and Planning

QuizVds.it

STUDENT NAME:

DATE AND TIME:

---

**01. What is the minimum flight visibility in airspace "E" for an aircraft operating under VFR at FL75?**

- a) 8000 m
- b) 1500 m
- c) 3000 m
- d) 5000 m

---

**02. What is the primary purpose of an aircraft accident investigation?**

- a) To identify the reasons and work out safety recommendations
- b) To clarify questions of liability within the meaning of compensation for passengers
- c) To work for the public prosecutor and help to follow-up flight accidents
- d) To Determine the guilty party and draw legal consequences

---

**03. What has to be considered for the speed during approach and landing?**

- a) Wind speed and weight
- b) Altitude and weight
- c) Wind speed and Altitude
- d) Weight and wind speed

---

**04. An inversion is a layer ...**

- a) With constant temperature with increasing height
- b) With increasing pressure with increasing height.
- c) With increasing temperature with increasing height.
- d) With decreasing temperature with increasing height.

---

**05. In case of a stall it is important to...**

- a) Increase the angle of attack and increase the speed.
- b) Decrease the angle of attack and increase the speed.
- c) Increase the angle of attack and reduce the speed.
- d) Increase the bank angle and reduce the speed.

# Exam simulation

QuizVds.it

---

## 06. How do spread and relative humidity change with increasing temperature?

- a) Spread remains constant, relative humidity increases
- b) Spread remains constant, relative humidity decreases
- c) Spread increases, relative humidity decreases
- d) Spread increases, relative humidity increases

---

## 07. Which transponder code indicates a radio failure?

- a) 7500
- b) 7700
- c) 7000
- d) 7600

---

## 08. What kind of information should be included in an urgency message?

- a) Nature of problem or observation, important information for support, departure aerodrome, information about position, heading and altitude
- b) Intended routing, important information for support, intentions of the pilot, information about position, departure aerodrome, heading and altitude
- c) Intended routing, important information for support, intentions of the pilot, departure aerodrome, destination aerodrome, heading and altitude
- d) Nature of problem or observation, important information for support, intentions of the pilot, information about position, heading and altitude

---

## 09. Which characteristic is important when choosing sunglasses used by pilots?

- a) Curved sidepiece
- b) Non-polarised
- c) Unbreakable
- d) No UV filter

---

## 10. What structural item provides lateral stability to an airplane?

- a) Wing dihedral
- b) Vertical tail
- c) Differential aileron deflection
- d) Elevator

# Exam simulation

SPL - Sailplane Pilot License - Flight Performance and Planning

QuizVds.it

---

**11. Two engine-driven aircraft are flying on crossing courses at the same altitude. Which one has to divert?**

- a) Both have to divert to the left
- b) The lighter one has to climb
- c) The heavier one has to climb
- d) Both have to divert to the right

---

**12. Rotation around the vertical axis is called...**

- a) Slipping.
- b) Pitching.
- c) Yawing.
- d) Rolling.

---

**13. What kind of defect results in loss of airworthiness of an airplane?**

- a) Dirty wing leading edge
- b) Crack in the cabin hood plastic
- c) Scratch on the outer painting
- d) Damage to load-bearing parts

---

**14. What phrase is used by a pilot to inform the tower about a go-around?**

- a) Pulling up
- b) Going around
- c) No landing
- d) Approach canceled

---

**15. The elevator moves an aeroplane around the...**

- a) Vertical axis.
- b) Longitudinal axis.
- c) Elevator axis.
- d) Lateral axis.

# Exam simulation

SPL - Sailplane Pilot License - Flight Performance and Planning

QuizVds.it

---

**16. What does the dynamic pressure depend directly on?**

- a) Lift- and drag coefficient
- b) Air density and airflow speed squared
- c) Air density and lift coefficient
- d) Air pressure and air temperature

---

**17. The "swiss cheese model" can be used to explain the...**

- a) State of readiness of a pilot.
- b) Procedure for an emergency landing.
- c) Optimal problem solution.
- d) Error chain.

---

**18. What is the correct way to transmit the call sign OE-JVK?**

- a) Omega Echo Jankee Victor Kilo
- b) Omega Echo Juliett Victor Kilogramm
- c) Oscar Echo Jankee Victor Kilogramm
- d) Oscar Echo Juliett Victor Kilo

---

**19. What is the correct term for the system which, among others, controls breathing, digestion, and heart frequency?**

- a) Critical nervous system
- b) Autonomic nervous system
- c) Automatical nervous system
- d) Compliant nervous system

---

**20. What does a cloud coverage of "BKN" mean in a METAR weather report?**

- a) 1 to 2 eighths
- b) 5 to 7 eighths
- c) 3 to 4 eighths
- d) 8 eighths

# Exam simulation

SPL - Sailplane Pilot License - Flight Performance and Planning

QuizVds.it

---

**21. Which abbreviation is used for the term "visual flight rules"?**

- a) VFS
- b) VRU
- c) VFR
- d) VMC

---

**22. Urgency messages are defined as...**

- a) Messages concerning aircraft and their passengers which face a grave and imminent threat and require immediate assistance.
- b) Messages concerning urgent spare parts which are needed for a continuation of flight and which need to be ordered in advance.
- c) Information concerning the apron personell and which imply an imminent danger to landing aircraft
- d) Messages concerning the safety of an aircraft, a watercraft or some other vehicle or person in sight.

---

**23. Which parts of an aircraft mainly affect the generation of induced drag?**

- a) The front part of the fuselage.
- b) The outer part of the ailerons.
- c) The lower part of the gear.
- d) The wing tips.

---

**24. Which answer is correct concerning stress?**

- a) Everybody reacts to stress in the same manner
- b) Stress and its different symptoms are irrelevant for flight safety
- c) Stress can occur if there seems to be no solution for a given problem
- d) Training and experience have no influence on the occurrence of stress

---

**25. Which statement describes a situation of static stability?**

- a) An aircraft distorted by external impact will return to the original position
- b) An aircraft distorted by external impact will tend to an even more deflected position
- c) An aircraft distorted by external impact will maintain the deflected position
- d) An aircraft distorted by external impact can return to its original position by rudder input

# Exam simulation

QuizVds.it

---

**26. In a co-ordinated turn, how is the relation between the load factor (n) and the stall speed (Vs)?**

- a) N is smaller than 1, Vs is greater than in straight and level flight.
- b) N is greater than 1, Vs is smaller than in straight and level flight.
- c) N is greater than 1, Vs is greater than in straight and level flight.
- d) N is smaller than 1, Vs is smaller than in straight and level flight.

---

**27. Which answer is correct with regard to separation in airspace "E"?**

- a) VFR traffic is not separated from any other traffic
- b) VFR traffic is separated only from IFR traffic
- c) VFR traffic is separated from VFR and IFR traffic
- d) IFR traffic is separated only from VFR traffic

---

**28. What is the meaning of the abbreviation "ARC"?**

- a) Airworthiness Recurring Control
- b) Airspace Rulemaking Committee
- c) Airworthiness Review Certificate
- d) Airspace Restriction Criteria

---

**29. What does the abbreviation "HX" stand for?**

- a) 24 h service
- b) Sunrise to sunset
- c) No specific opening hours
- d) Sunset to sunrise

---

**30. What is the difference in latitude between A (12°53'30"N) and B (07°34'30"S)?**

- a) .05,19°
- b) .20,28°
- c) .05°19'00"
- d) .20°28'00"

# Exam simulation

QuizVds.it

---

## 31. Where can the type of restriction for a restricted airspace be found?

- a) AIC
- b) ICAO chart 1:500000
- c) AIP
- d) NOTAM

---

## 32. A glider's trim lever is used to...

- a) Reduce stick force on the elevator.
- b) Reduce stick force on the ailerons.
- c) Reduce stick force on the rudder.
- d) Reduce the adverse yaw.

---

## 33. What is the correct phrase with respect to wake turbulence to indicate that a light aircraft is following an aircraft of a higher wake turbulence category?

- a) Caution wake turbulence
- b) Be careful wake winds
- c) Danger jet blast
- d) Attention propwash

---

## 34. What information is provided in the general part (GEN) of the AIP?

- a) Table of content, classification of airfields with corresponding maps, approach charts, taxi charts, restricted and dangerous airspaces
- b) Access restrictions for airfields, passenger controls, requirements for pilots, license samples and validity periods
- c) Map icons, list of radio nav aids, time for sunrise and sunset, airport fees, air traffic control fees
- d) Warnings for aviation, ATS airspaces and routes, restricted and dangerous airspaces

---

## 35. Which section of the flight manual describes the basic empty mass of an aircraft?

- a) Limitations
- b) Normal procedures
- c) Weight and balance
- d) Performance

# Exam simulation

SPL - Sailplane Pilot License - Flight Performance and Planning

QuizVds.it

## 36. Distress messages are messages...

- a) Concerning the safety of an aircraft, a watercraft or some other vehicle or person in sight.
- b) Concerning the operation or maintenance of facilities which are important for the safety and regularity of flight operations.
- c) Concerning aircraft and their passengers which face a grave and imminent threat and require immediate assistance.
- d) Sent by a pilot or an aircraft operating agency which have an imminent meaning for aircraft in flight.

## 37. What does a cloud coverage of "FEW" mean in a METAR weather report?

- a) 5 to 7 eighths
- b) 8 eighths
- c) 3 to 4 eighths
- d) 1 to 2 eighths

## 38. The required data for a mass and balance calculation including masses and balance arms can be found in the...

- a) Certificate of airworthiness
- b) Mass and balance section of the pilot's operating handbook of this particular aircraft.
- c) Performance section of the pilot's operating handbook of this particular aircraft.
- d) Documentation of the annual inspection.

## 39. What visual flight conditions can be expected after the passage of a cold front?

- a) Good visibility, formation of cumulus clouds with showers of rain or snow
- b) Poor visibility, formation of overcast or ground-covering stratus clouds, snow
- c) Scattered cloud layers, visibility more than 5 km, formation of shallow cumulus clouds
- d) Medium visibility with lowering cloud bases, onset of prolonged precipitation

## 40. What weather is likely to be experienced during "Foehn" in the Bavarian area close to the alps?

- a) Cold, humid downhill wind on the lee side of the alps, flat pressure pattern
- b) Nimbostratus cloud in the southern alps, rotor clouds at the lee side, warm and dry wind
- c) High pressure area overhead Biskaya and low pressure area in Eastern Europe
- d) Nimbostratus cloud in the northern alps, rotor clouds at the windward side, warm and dry wind

# Exam simulation

SPL - Sailplane Pilot License - Flight Performance and Planning

QuizVds.it

**41. An aircraft in the northern hemisphere intends to turn on the shortest way from a heading of 360° to a heading of 270°. At approximately which indication of the magnetic compass should the turn be terminated?**

- a) 360°
- b) 270°
- c) 240°
- d) 300°

**42. The sandwich structure consists of two...**

- a) Thick layers and a light core material.
- b) Thick layers and a heavy core material.
- c) Thin layers and a light core material.
- d) Thin layers and a heavy core material

**43. Rotation around the lateral axis is called...**

- a) Yawing.
- b) Pitching.
- c) Rolling.
- d) Stalling.

**44. An aircraft must be loaded and operated in such a way that the center of gravity (CG) stays within the approved limits during all phases of flight. This is done to ensure...**

- a) That the aircraft does not exceed the maximum permissible airspeed during a descent
- b) Both stability and controllability of the aircraft.
- c) That the aircraft does not tip over on its tail while it is being loaded.
- d) That the aircraft does not stall.

**45. What conditions are favourable for the formation of thunderstorms?**

- a) Calm winds and cold air, overcast cloud cover with St or As.
- b) Warm and dry air, strong inversion layer
- c) Warm humid air, conditionally unstable environmental lapse rate
- d) Clear night over land, cold air and patches of fog

# Exam simulation

SPL - Sailplane Pilot License - Flight Performance and Planning

QuizVds.it

---

## 46. What has to be considered when entering an RMZ?

- a) To obtain a clearance to enter this area
- b) To permanently monitor the radio and if possible to establish radio contact
- c) To obtain a clearance from the local aviation authority
- d) The transponder has to be switched on Mode C and squawk 7000

---

## 47. What is the usual direction of movement of a polar front low?

- a) Parallel to the the warm-sector isobars
- b) To the northeast during winter, to the southeast during summer
- c) Parallel to the warm front line to the south
- d) To the northwest during winter, to the southwest during summer

---

## 48. Considering longitudinal stability, which C.G. position is most dangerous with a normal gliding plane?

- a) Position beyond the front C.G. limit
- b) Position too far aside permissible C.G. limits.
- c) Position far back within permissible C.G. limits
- d) Position beyond the rear C.G. limit

---

## 49. In what cases is visibility transmitted in kilometers?

- a) Greater than 10 km
- b) Up to 5 km
- c) Greater than 5 km
- d) Up to 10 km

---

## 50. A gliding plane is about to pitch down due to stall. What rudder input can prevent nose-dive and spin?

- a) Ailerons neutral, rudder strongly kicked to lower wing
- b) Release elevator, rudder opposite to lower wing
- c) Keep airplane in level flight using rudder pedals
- d) Slightly pull the elevator, ailerons opposite to lower wing

# Exam simulation

SPL - Sailplane Pilot License - Flight Performance and Planning

QuizVds.it

---

## 51. What is the meaning of the red range on the airspeed indicator?

- a) Speed which must not be exceeded regardless of circumstances
- b) Speed which must not be exceeded within bumpy air
- c) Speed which must not be exceeded with flaps extended
- d) Speed which must not be exceeded in turns with more than 45° bank

---

## 52. The term 'civil twilight' is defined as...

- a) The period of time before sunrise or after sunset where the midpoint of the sun disk is 6 degrees or less below the apparent horizon.
- b) The period of time before sunrise or after sunset where the midpoint of the sun disk is 6 degrees or less below the true horizon.
- c) The period of time before sunrise or after sunset where the midpoint of the sun disk is 12 degrees or less below the true horizon.
- d) The period of time before sunrise or after sunset where the midpoint of the sun disk is 12 degrees or less below the apparent horizon.

---

## 53. What is the difference between spin and spiral dive?

- a) Spin: stall at inner wing, speed increasing rapidly; Spiral dive: airflow at both wings, speed constant
- b) Spin: stall at inner wing, speed constant; Spiral dive: airflow at both wings, speed increasing rapidly
- c) Spin: stall at outer wing, speed constant; Spiral dive: airflow at both wings, speed increasing rapidly
- d) Spin: stall at outer wing, speed increasing rapidly; Spiral dive: airflow at both wings, speed constant

---

## 54. An aerodrome beacon (ABN) is a...

- a) Fixed beacon installed at an airport or aerodrome to indicate its location to aircraft pilots from the air
- b) Rotating beacon installed at the beginning of the final approach to indicate its location to aircraft pilots from the air.
- c) Rotating beacon installed at an airport or aerodrome to indicate its location to aircraft pilots from the air.
- d) Rotating beacon installed at an airport or aerodrome to indicate its location to aircraft pilots from the ground.

---

## 55. How is an air mass described when moving to Central Europe via the Russian continent during winter?

- a) Maritime tropical air
- b) Continental polar air
- c) Maritime polar air
- d) Continental tropical air

# Exam simulation

SPL - Sailplane Pilot License - Flight Performance and Planning

QuizVds.it

---

**56. What pressure pattern can be observed at a lift-generating wing profile at positive angle of attack?**

- a) Low pressure is created above, higher pressure below the profile
- b) Pressure above remains unchanged, higher pressure is created below the profile
- c) High pressure is created above, lower pressure below the profile
- d) Pressure below remains unchanged, lower pressure is created above the profile

---

**57. The pressure at MSL in ISA conditions is...**

- a) 1013.25 hPa.
- b) 113.25 hPa.
- c) 15 hPa.
- d) 1123 hPa.

---

**58. What is the gas composition of "air"?**

- a) Oxygen 78 % Water vapour 21 % Nitrogen 1 %
- b) Oxygen 21 % Nitrogen 78 % Noble gases / carbon dioxide 1 %
- c) Oxygen 21 % Water vapour 78 % Noble gases / carbon dioxide 1 %
- d) Nitrogen 21 % Oxygen 78 % Noble gases / carbon dioxide 1 %

---

**59. Which statement regarding a spin is correct?**

- a) During recovery the ailerons should be kept neutral
- b) During the spin the speed constantly increases
- c) During recovery the ailerons should be crossed
- d) Only very old aeroplanes have a risk of spinning

---

**60. The mass loaded on the plane is lower than the minimum load required by the load sheet. What action has to be taken?**

- a) Trim aircraft to "pitch down"
- b) Change pilot seat position
- c) Change incident angle of elevator
- d) Load ballast weight up to minimum load

# Exam simulation

SPL - Sailplane Pilot License - Flight Performance and Planning

QuizVds.it

---

## 61. Where is interference drag generated?

- a) At the ailerons
- b) At the the gear
- c) At the wing root
- d) Near the wing tips

---

## 62. The aerodynamic rudder balance...

- a) Reduces the control surfaces.
- b) Delays the stall.
- c) Reduces the control stick forces.
- d) Improves the rudder effectiveness.

---

## 63. A sailplane is operated with additional water ballast. How do best gliding angle and speed of best glide change, when compared to flying without water ballast?

- a) Best gliding angle descreases, best glide speed decreases.
- b) Best gliding angle remains unchanged, best glide speed increases.
- c) Best gliding angle remains increases, best glide speed increases.
- d) Best gliding angle remains unchanged, best glide speed decreases.

---

## 64. What situation is called "over-development" in a weather report?

- a) Change from blue thermals to cloudy thermals during the afternoon
- b) Development of a thermal low to a storm depression
- c) Vertical development of Cumulus clouds to rain showers
- d) Widespreading of Cumulus clouds below an inversion layer

---

## 65. What are the major components of an aircraft's tail?

- a) Rudder and ailerons
- b) Steering wheel and pedals
- c) Horizontal tail and vertical tail
- d) Ailerons and elevator

# Exam simulation

SPL - Sailplane Pilot License - Flight Performance and Planning

QuizVds.it

---

**66. After getting around a turning point, what should a glider pilot be prepared for? (2,00 P.)**

- a) For weakening thermals due to the progressing time
- b) For a changed horizontal picture due to lower cloud bases
- c) For increased cloud dissipation due to the progressing time
- d) For a changed cloud picture due to the apparently changed position of the sun

---

**67. What is meant by the term "terrestrial navigation"?**

- a) Orientation by ground celestial object during visual flight
- b) Orientation by instrument readings during visual flight
- c) Orientation by ground features during visual flight
- d) Orientation by GPS during visual flight

---

**68. Which of the following documents have to be on board for an international flight? a) Certificate of aircraft registration b) Certificate of airworthiness c) Airworthiness review certificate d) EASA Form-1 e) Airplane logbook f) Appropriate papers for every crew member g) Technical logbook**

- a) B, c, d, e, f, g
- b) A, b, c, e, f
- c) D, f, g
- d) A, b, e, g

---

**69. How is referred to a tubular steel construction with a non self-supporting skin?**

- a) Grid construction
- b) Honeycomb structure
- c) Monocoque construction
- d) Semi-monocoque construction.

---

**70. What is the advantage of differential aileron movement?**

- a) The drag of the downwards deflected aileron is lowered and the adverse yaw is smaller
- b) The total lift remains constant during aileron deflection
- c) The ratio of the drag coefficient to lift coefficient is increased
- d) The adverse yaw is higher
