

01. The validity of a medical examination certificate class 2 for a 62 years old pilot is...

- a) 60 Months.
- b) 48 Months.
- c) 24 Months
- d) 12 Months.

02. Which area is suitable for an off-field landing?

- a) Harvested cornfield
- b) Glade with long dry grass
- c) Plowed field
- d) Sports area in a village

03. Which statement about the airflow around an aerofoil is correct if the angle of attack increases?

- a) The stagnation point moves down
- b) The center of pressure moves down
- c) The center of pressure moves up
- d) The stagnation point moves up

04. What could be a reason for changing the runway indicators at aerodromes (e.g. from runway 06 to runway 07)?

- a) The magnetic deviation of the runway location has changed
- b) The magnetic variation of the runway location has changed
- c) The direction of the approach path has changed
- d) The true direction of the runway alignment has changed

05. Regarding the type of cloud, precipitation is classified as...

- a) Light and heavy precipitation.
- b) Showers of snow and rain
- c) Prolonged rain and continuous rain.
- d) Rain and showers of rain.

06. What is the meaning of the red range on the airspeed indicator?

- a) Speed which must not be exceeded within bumpy air
- b) Speed which must not be exceeded with flaps extended
- c) Speed which must not be exceeded regardless of circumstances
- d) Speed which must not be exceeded in turns with more than 45° bank

07. Provided that no other procedure is described in the Aircraft Operating Handbook, after increasing the engine power in a go-around, the flaps may...

- a) Not be operated up to the minimum safe altitude
- b) Be retracted to a middle position
- c) Be fully retracted without any delay.
- d) Remain fully extended until reaching the traffic pattern

08. What is the lowest possible VFR flight level if a true course of 181° is selected and a variation of 3° east exists?

- a) FL 050
- b) FL 060
- c) FL 055
- d) FL 065

09. Which statement is correct with regard to the term "taxi holding point"?

- a) A taxi holding point is an area where the aircraft must stop unless further permission to proceed is given
- b) A taxi holding point is only to be observed for IFR traffic if instrument weather conditions are prevailing
- c) A taxi holding point is the point at which the aircraft must stop unless further permission to proceed is given
- d) A taxi holding point is designed to indicate the beginning of the safety area and may be crossed when a taxi clearance is given

10. What is the call sign of the aerodrome control?

- a) Tower
- b) Airfield
- c) Ground
- d) Control
